

Procedures for handing in farm exercise

It is important that you hand in all your exercises using the steps below. The purpose of this procedure is to ensure you get proper credit for your work.

1.) For every assignment you hand in, you must create a folder named as follows: your last name_exercise_name

So for example, my folder would be named:

ruel_farm_storyboard

Use all lowercase letters and an underline to separate multiple words. You should use the name of the assignment that is at the top of the handout or assignment sheet. If no handout or assignment sheet was provided, the professor will provide the name that should be used.

2.) Inside this folder should be all the files necessary to view your work AS WELL AS a PDF of the home page.

3.) Place a copy of the entire folder in the folder called "DROPBOX" on the class server.
